

Aggreko Service Bay Structure

Aggreko is the global leader in generator and temperature control equipment and follows a rigid maintenance programme to make sure all the equipment is operating correctly and ready for immediate hire.

A service and wash bay area was exposed to the weather which restricted its use during adverse weather conditions.

Shade Living resolved this issue by designing a cantilever arch structure that is fixed to the pre cast concrete wall and projects out over the wash bay.

Due to the large size of the equipment it was necessary to maintain an entry clearance height of 5 metres above the paved surface.

Client:
Aggreko

Location:
Braeside

Date of Completion:
February, 2012

Product Type:
Cantilever arch structure

Fabric Type:
PVC – Ferrari 802S

Steel Finish:
Hot dipped galvanized

Scope of Works:
Design
Engineering
Manufacture
Project Management
Install

Area of Coverage:
80 m²

Function:
Weather protection for a service bay area.
