

Ascot Vale Sports & Aquatic Centre Custom Shade Structure

The redevelopment of the Ascot Vale Aquatic Centre positioned the entrance and café areas on the Western face and therefore to reduce the amount of sun penetration it was proposed to install vertical shade membranes across three roof sections.

The use of a micro perforated fabric enabled the irregular shape to be patterned correctly and more easily tensioned on site.

Client:

Buxton Construction

Location:

Ascot Vale, Vic

Date of Completion:

October, 2007

Product Type:

Vertical screens

Fabric Type:

Micro perforated PVC – Soltis 86

Steel Finish:

Scope of Works:

Design
Engineering
Manufacture
Project Management
Install

Area of Coverage:

60 m²

Function:

To provide partial shading to west facing windows of a new aquatic centre.
