

Coburg Olympic Pool

Shade sails

Moreland Council was seeking shade to replace two old hip and ridge structures at the facility (one over the toddler's pool and one beside the diving pool). They were also seeking a design to cover the northern end of the learner's pool.

In order to cover the 12 metre span over the learner's pool a dual hyper shade sail structure was installed with a linked tracer cable supporting both of the sails over the pool. This innovative design is both effective and eye catching.

The large hyper sail over the toddler's pool was designed on the diagonal to the pool itself to minimize the spans required and so as not to over shade the pool.

Client:
Moreland City Council

Location:
Coburg, Vic

Date of Completion:
December 2008

Product Type:
Shade sails

Fabric Type:
Monotec 370 Series
shadecloth

Steel Finish:
Galvanised and powdercoated

Scope of Works:
Design
Engineering
Manufacture
Project Management
Install

Area of Coverage:
250 square metres (5 Sails)

Function:
Shade protection over pools
and surrounding area.
