

Dandenong Valley School

Shade Sails

Shade Living designed shade sails in conjunction with the new playground area which had been designed by Mary Jeavons Landscape Architects. Shade sails were provided over the playground equipment, a sandpit area, deck and courtyard.

The design over the main playground unit consisted of two hypar (twisting) shade sails on 6 posts.

The bright orange and blue shade sails picked up the two main colours within the playground equipment itself and created a vibrant and uplifting addition to the overall play space as well as providing excellent shade.

Client:
Dandenong Valley School

Location:
Dandenong, VIC

Date of Completion:
October, 2010

Product Type:
Shade Sails

Fabric Type:
Monotec 370 Series
shadecloth

Steel Finish:
Hot dip galvanised

Scope of Works:
Design
Engineering
Manufacture
Install

Area of Coverage:
220 square metres approx.

Function:
Shade over playground
equipment and associated
play areas.
