

Duncan McKinnon Reserve

Cantilever Arch Structure

Glen Eira Council was seeking a structure adjacent to the netball courts to provide shade and waterproof protection for players and spectators.

The park initially had umbrella structures, however these were being vandalized so a higher style structure was requested. The two V-column style structure provided an attractive and effective solution for the site.

The master plan for the site is to install additional structures alongside the court in the future.

Client:
Glen Eira City Council

Location:
Duncan McKinnon Reserve,
Bentleigh, Vic

Date of Completion:
July 2009

Product Type:
Cantilever Arch Structure

Fabric Type:
PVC – Hiroaka 104T

Steel Finish:
Galvanised & Powder coated

Scope of Works:
Design
Engineering
Manufacture
Installation

Area of Coverage:
40m²

Function:
Shade & waterproof structure
for adjacent to netball courts.
