

# Eastern Treatment Plant

## Mono Hypar Umbrellas

A newly developed seating area for staff to use during meal breaks required shade structures over a paved courtyard and grassed area. Due to the location in front of the office complex the client was looking for individual structures that were functional and visually attractive.

To address the design criteria five Structureflex Mono Hypar umbrellas were installed throughout the area. These uniquely shaped structures are mounted on a central post which means that the area is not cluttered with supporting columns and can be positioned over individual seating areas.

**Client:**  
Theiss Services

**Location:**  
Bangholme, Vic

**Date of Completion:**  
August, 2009

**Product Type:**  
Mono Hypar Umbrella
