Mono Hypar Umbrella

Maroondah City Council developed a community cultural and arts facility for the local residents and as part of these works a landscaped garden area was built at the rear of the building.

These textured concrete areas are focal points of the area and the council was keen to provide additional shade protection over one area.

To reduce the number of supporting columns a large 8 metre x 8 metre hypar umbrella structure was installed in the middle of the circular paved area. This structure maintains openness to the area while providing the necessary shade coverage.

Client:
Maroondah City Council

Location:
Ringwood, Vic

Date of Completion:
March, 2006

Product Type:
Hypar Umbrella Structure

Fabric Type:
HDPE - Shadecloth

Steel Finish:
Hot dipped galvanized & powder coated

Scope of Works:
Design
Engineering
Manufacture
Project Management
Install

Area of Coverage:
64 m²

Function:
Shade structure over paved garden area.
