

Hampton Bowls Club

Cantilever Structure

The north facing verandah was renovated to incorporate an extended timber deck and seating area. As part of these works a cantilevered arch structure was installed along the deck area to provide waterproof protection for the new seating area.

The fabric membrane was positioned over the roof line so that a weatherproof cover was achieved while maintaining an open area for viewing the bowling rink.

Client:
Hampton Bowls Club

Location:
Hampton, Vic

Date of Completion:
July, 2007

Product Type:
Cantilever Structure

Fabric Type:
PVC – Mehler FR700
