

# Hopetoun Gardens Reserve

## Description: Shade Sails

The City of Glen Eira were seeking shade sails to cover playground equipment within this public park. Our design incorporated two hypar (twisting) shade sails on four posts.

The height of the sails were designed to be both eye catching as well as minimizing the potential for vandalism to the sails whilst still maintaining adequate shade over the equipment itself.

Vandal fins were also manufactured into the post to restrict the potential of vandals climbing up the posts and secondary security / safety cables were installed at all posts connections.

### Client:

City of Glen Eira

### Location:

Hopetoun Gardens Reserve,  
Elsternwick

### Date of Completion:

August, 2009

### Product Type:

Shade Sails

### Fabric Type:

Monotec 370 series  
shadecloth

### Steel Finish:

Hot dip galvanised with a two  
pack pain system.

### Scope of Works:

Design  
Engineering  
Manufacture  
Project Management  
Installation

### Area of Coverage:

Approx 200 square metres

### Function:

Shade sails to cover  
playground equipment
