

# Japanese Mountain Retreat

## Europa Structure

The Japanese Mountain Retreat is an exclusive accommodation complex located in the Dandenong Ranges used for romantic getaways.

The owners of the venue wanted to install a freestanding structure that fitted in with the Japanese theme of the site to be utilized by patrons for dining, drinking coffee or purely enjoying the ambience of the surrounds.

An 8 metre x 8 metre Europa structure on 8 perimeter posts was installed in conjunction with a deck with parquet flooring creating a unique building structure. A ziptrack retractable PVC blind system was installed to all sides of the structure providing the versatility for the internal space to be used as an indoor / outdoor room both in summer and winter.

The conic form of the membrane along with the black colour scheme chosen for the structure provided the ideal look to compliment the site.

**Client:**  
Japanese Mountain Retreat

**Location:**  
Montrose

**Date of Completion:**  
December 2012

**Product Type:**  
Europa Structure

**Fabric Type:**  
Hiroaka 104T PVC

**Steel Finish:**  
Hot dip galvanized and finished with a powdercoated surface

**Scope of Works:**  
Design  
Engineering  
Project Management  
Installation

**Area of Coverage:**  
64m<sup>2</sup>

**Function:**  
Provide waterproof structure for dining and entertaining.
