

Kool Kidz on Wellington

Cantilever Structure

This new child care centre and kindergarten required three shade structures for the various playground areas. The toddler playground was located on the South side of the building and therefore it was important to provide shade coverage over the climbing equipment during the middle part of the day.

Due to the narrow play area a cantilever shade structure was installed with the membrane projecting out 4.6 metres from the building verandah and supported on three columns positioned along the building line.

Client:
Funskool

Location:
Rowville, Vic

Date of Completion:
January 2008

Product Type:
Cantilever Structure

Fabric Type:
HDPE – Shadecloth

Steel Finish:
Hot dipped galvanized

Scope of Works:
Design
Engineering
Manufacture
Project Management
Install

Area of Coverage:
40m²

Function:
Shade structure required for toddler play area at new child care centre.
