

# Plum Garland Reserve

## Shade Sails

The playground at Plum Garland Reserve on the foreshore at Albert Park was upgraded with new play equipment and the shade sails were replaced to provide protection for this new design.

The shade sails were reconfigured to suit the new layout while maintaining the existing mass concrete pad footings.

In addition to the eight hypar sails two Pacifica umbrellas were provided over seating areas directly that provided localized shade coverage to passive areas directly adjacent to the playground facility.

The new playground is very popular with local community and is actively used by all the children attending this beach location.

**Client:**  
City of Port Phillip

**Location:**  
Albert Park

**Date of Completion:**  
January, 2013

**Product Type:**  
Shade sails and umbrella structures

**Fabric Type:**  
Monotec Series 370 shadecloth

**Steel Finish:**  
Hot dipped galvanized and 3 pack coating system.

**Scope of Works:**  
Design  
Engineering  
Project Management  
Manufacture  
Installation

**Area of Coverage:**  
450 m<sup>2</sup>

**Function:**  
Shade protection for upgraded playground reserve
