

Powerhouse Function Centre

Barrel Arch Structure

The Powerhouse Function Centre is located in a picturesque site overlooking Albert Park Lake and alongside the Formula One race track. The function room has an adjoining first floor terrace which is used for pre function drinks and as a smoking area.

A half barrel arch structure was installed over the 23 metre long terrace and projecting out 6 metres from the building, effectively increasing the function room size by 140 m².

To maintain the visual aspect while providing a sheltered area, clear PVC blinds were installed around the perimeter of the structure which allows the area to be opened up or partly closed as the weather permits.

Client:

Life's a Party Catering Group

Location:

Albert Park, Vic

Date of Completion:

February, 2006

Product Type:

Barrel Arch

Fabric Type:

PVC – Mehler FR700
