

# Rotary Park, Alexandra

## Soundshell PVC Membrane Structure

As part of improvements to the Alexandra Tourist Information Centre the stage area at the rear of the building was extended and a PVC membrane structure was installed over the stage. The stage is used for hosting public events such as local festivals, carols by candlelight etc.

The tensioned membrane structure was designed to cantilever over the building to the rear to provide weather protection and connection points for electrics, lights and speakers were incorporated into the steel frame.

The finished structure greatly enhances both the aesthetics and functionality of this facility and will be a great asset for the local community.

**Client:**  
Shire of Murrindindi

**Location:**  
Alexandra, Victoria

**Date of Completion:**  
December, 2010

**Product Type:**  
Soundshell PVC membrane structure

**Fabric Type:**  
PVC – Ferrari 802S

**Steel Finish:**  
Luxathane paint

**Scope of Works:**  
Design  
Engineering  
Manufacture  
Project Management  
Install

**Area of Coverage:**  
140 m<sup>2</sup>

**Function:**  
Waterproof structure over an outdoor stage.
