

St Brendan's School

Cantilever Arch Structure

St Brendan's School were looking for a shade structure with minimal posts over a passive seating area within the junior section of the school.

The 15 metre x 6.5 metre cantilever arch structure on 3 posts was a cost effective and elegant way of fulfilling their brief and providing efficient shade over the area.

The use of the Moroccan (terracotta) colour Monotec fabric with primrose steelwork tied in very nicely with the heritage buildings within the school

Client:
St Brendan's School

Location:
Flemington, Vic

Date of Completion:
January 2010

Product Type:
Cantilever Arch Structure

Fabric Type:
Monotec 370 Series
shadecloth
